FAX: (406) 444-0533

P.O. BOX 201601  
HELENA, MONTANA 59620

From: Ethan Mace, Hydrologist, MT DNRC Water Resource Division

Date: December 12, 2017

RE: Summary of instream flow water right application information (form 638) pursuant to the US Forest Service-Montana Water Rights Compact, MCA 85-20-1401, as of December 07, 2017.

The Compact was ratified on April 17<sup>th</sup> of 2007. As part of that ratification, in Article V, seventy-seven water reservations were issued, purposed for instream fisheries, and assigned 2007 priority dates. The US Forest Service was also granted the opportunity to apply for additional instream state-based water reservations pursuant Article VI, whose priority dates are designated as the date of application filing with DNRC. Protectable flow rates are determined using the Wetted Perimeter Methodology, which estimates 'upper' and 'lower' flow rate values (inflection points) that designate habitat quality thresholds. The fish species present within the proposed protected reach determines which flow rate can be used.

<b>USFS Instream Water Reservations (form 638) Pursuant MCA 85-20-1401</b>											
Processing actions are organized by date of occurrence											
	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	Total all years
